Subject: Request for Info - File # 0415-EX-PL-2016

---

Message:

Dear Madam/Sir,

We have received a request for the AFTRCC coordination and FAA coordination.

Upon research, it seems that the aforementioned information is required for license for aviation or ATG system.

The experimental license Brocade had filed for does not involve aviation or ATG and it will reside inside the Brocade lab; hence we do not have the AFTRCC or FAA coordination as of now.

Please let us know whether we still need to provide the information and if so, it would be great if you could guide us in how to get the AFTRCC/FAA coordination.

Thanks,

-Heeseon
