RE: Request for Special Temporary Authority
Experimental License KO2XDO
BST, Inc.

Attention: Doug Young
Experimental Licensing Branch

On behalf of our client, BST, Inc., we hereby seek Special Temporary Authorization (STA) to utilize certain frequencies at 2.3 and 2.4 GHz for video production purposes. BST has completed coordination with the Aeronautical Flight Test Radio Coordination Council (AFTRCC) as necessary.

BST is a manufacturer and provider of video transmission equipment for remote video and film production at sporting events and automobile racing competitions in particular. It has previously been granted STAs for specific racing events, conditioned upon prior AFTRCC coordination. The dates and locations of each event are as highlighted on the attached exhibit A. BST proposes to operate on five frequencies (2316, 2350, 2333, 2367, and 2384 MHz) with a power output of 1.5 watts. The camera/transmitters are to be installed in race vehicles and operated on a portable basis during golf competitions.

The coordination process with AFTRCC officials is complete and approvals are attached as EXHIBIT B.

This request is being filed in Pittsburgh with a check from this office for the requisite filing fee of \$45.00 (Fee Code EAE) made payable to the Commission. A copy is being delivered to Mr. Doug Young to facilitate prompt attention.

Mr. Doug Young
