

EXHIBIT TO STA REQUEST

According to the FCC's GENMEN database, there are two ITFS licensees operating on 2538 MHz within fifty miles of the coordinates of the golf course specified in the application. BST has tried to contact both of these licensees prior to the filing of this application. Repeated phone calls to the Howard Lake-Waverly Public School, Howard, Minnesota, call sign WND309, went unanswered, as it is summertime it unlikely that BST will be able to reach anyone there before tomorrow. It is also likely no one is at the school during this time. Thus, we believe it is a reasonable inference that the school is not currently operating its ITFS station.

BST has left a message with Minnesota Public Radio, Makato, Minnesota, licensee of WHR754. Once we have received concurrence from the licensee, BST will amend this application to specify that concurrence has been received for use of 2538 MHz.
