Re: Request for Special Temporary Authority for
Use of Certain Frequencies During Automobile
Races for Video Cameras in Automobiles:
Broadcast Sports Technology; File No. S-1424-EX-93.

Dear Mr. Wright:

On behalf of our client, Broadcast Sports Technology (BST), located at 2135 Espey Court, #4, Crofton, MD, 21114, this letter respectfully requests special temporary authority to operate type accepted video transmitters on certain discrete frequencies prior to, during, and shortly after certain automobile races during 1995, as listed in the attached sheet.

The discrete frequencies are the following; 2316, 2333, 2350, 2367, 2384 MHz. The power output is 2.5 watts, and the emission type is 20M0FXW. The video transmitters are TVT 50 units. The camera/transmitters would be installed in race vehicles. Each proposed operation has been approved by the requisite AFTRCC frequency coordinator, as per the attached coordination forms received by BST via facsimile. The requested STA is similar to a prior STA, File No. S-1424-EX-93, call letters KO2XDO, issued for the period April 8, 1994 through October 8, 1994, with the only difference being the emission type.

Inquiries or notifications during the STA period can be directed to this office, or to Peter Larsson, who can be reached at 1-410-721-5151 or by facsimile at 1-410-721-6183.

The original of this STA request is being filed in Pittsburgh, together with the requisite filing fee in the amount of \$35.00, by check of this office payable to the Commission. Copies of the check and the FCC Form 155 are attached hereto as evidence of filing today.
