

Exhibit 2: Request For Confidential Treatment

Pursuant to Section 0.459 of Federal Communications Commission (“FCC” or the “Commission”) rules, 47 C.F.R. § 0.459, Burst Networks, Inc. (“Burst”) requests that portions of the instant application for experimental authorization (the “Application”), be given confidential treatment. Specifically, Burst requests that Exhibit 1 to the application be made confidential and not subject to public inspection. The information contained therein is confidential commercial information which is not customarily disclosed in the industry, and constitutes trade secrets and/or highly competitively sensitive business information. Given the highly competitive nature of the broadband PCS industry, disclosure of Burst’s business plans and system design to the general public could greatly harm the business of the company. Therefore, Burst requests that the confidential portion of the Application (Exhibit 1) not be made routinely available for public inspection.
