20th July, 2006

Dear Sir or Madam,

STATEMENT OF BUSINESS ONLY BROADBAND, AN ILLINOIS LIMITED
LIABILITY CORPORATION, IN SUPPORT OF APPLICATION FOR
EXPERIMENTAL LICENSE

In this application Business Only Broadband (“BOB”) requests an experimental license to operate within 3.4 GHz to 3.6 GHz for the purpose of conducting research on WIMAX systems.

BOB is an Internet Service Provider in the Chicago Land area and provides local businesses with a cost-effective last-mile alternative to the phone and cable companies. The research BOB wishes to conduct will be used by BOB to make an informed decision whether or not to integrate WIMAX systems to its existing infrastructure. The equipment compatibility and functionality exceeds the information BOB is able to acquire from manufacturer publications. In addition, real-world conditions in the Chicago Land area effect features such as throughput and stability, two critical

aspects of BOB's contractual deliverability of internet to its customers.

With that said, BOB's intention of testing WIMAX systems independent of manufacturer publication is crucial to its business and to the businesses of its customers.

BOB would like to thank the FCC for reviewing its application. Should you have questions, please do not hesitate to contact us.

Thank you,

Rich Kingston

CEO
