EXHIBIT No.1

With respect to Item No. 10 on the attached FCC form 442, Cable News Network (CNN) asserts that this application for New Radio Station Authorization will apply to its TCS-Lite (9200) INMARSAT-type satellite telephone unit. This unit will be used to support CNN's newsgathering efforts in disaster-stricken locations by providing telephone communications in situations where local telephone service has been interrupted or destroyed. The communications capability this unit will provide is vital to our newsgathering operation, as well as to the safety of field personnel.
