Subject: 1171-EX-ST-2021 pre-coordination data request

---

Message:

Good afternoon,

California Internet, L.P. dba GeoLinks has amended its recent STA application (File # 1171-EX-ST-2021) to remove the 5.18-5.24 GHz frequency range. Therefore, we believe no FAA coordination issues remain with the Application. Please advise. Thank you.
