

Applicant: Camgian Microsystems Corporation

File Number: 0175-EX-CM-2019

Correspondence Reference Number: 49593

The purpose of this license modification is (1) to add a new Camgian product development office location to the list of antenna test sites and (2) to expand the radii of operation at two Oktibbeha County, Mississippi test sites.

Camgian opened a new office in Tuscaloosa, Alabama. Research and development of a battery operated radar system will continue at the Starkville, Mississippi headquarters, and Camgian would like to expand this testing to the new Tuscaloosa, Alabama locations. This modification was recently made to another license we have for a similar device (call sign WJ2XDQ).

Furthermore, we would like to expand the radii of operation for two Oktibbeha County, Mississippi test sites. The northernmost test site encompasses the North Farm of Mississippi State University (a subcontractor for Camgian) where most testing is conducted. Expanding this radius and the southernmost test site radius would also encompass the South Farm of Mississippi State University, which is where we would also like to conduct tests.
