

Response to question 04/09/03.

"Stellar will not be providing or establishing a permanent or temporary telecommunications service to Canby Telephone Association Members or Customers. It is also recognized that the equipment being deployed does not comply with unlicensed spectrum power restrictions. After the initial evaluation period it is Canby's intent to seek licensed PCS Spectrum through either the FCC Auction Process (if any PCS licenses are available in the area) or through partitioning spectrum from a current license holder in order to supply services to its members and other potential customers."
