Subject: Additional Information Request

---

Message:

Nimesh,

I have adjusted the frequencies on file number 0489-EX-CN-2020 to the following range of 2570-2620, but will operate on 2600 with a 20MHz emission. This way we are far enough away from both the AFTRCC and Sirius XM for our IoT testing. Please let me know if there is anything else is required.

Thank you for your support.

Sincerely,

David Suarez
