Message:

A new revision of the ODAR was submitted today entitled Signed ODAR Rev E. This revision addresses the reviewers points as follows:

1. Stowed, not undeployed, is used throughout Rev E.
2. Section 2 of Rev E gives dimensions for deployed panels, detailed bounding box dimensions, and ranges of visible surface area from different angles.
- 3-4. In section 2 of Rev E, the deployment sequence, the role of the microcontroller, its heritage, and its use in Hatchling are described in greater detail.
