

CAVU, Inc.
Application for New Experimental License
Exhibit A
Item 10

CAVU, Inc. ("CAVU") is a leading provider of millimeter wave digital transmission services. The experimental license is necessary for CAVU to test and operate its fixed microwave equipment in the 38.6-40.0 GHz frequency band in the Miami area. The 38 GHz link requested in this application will be used to assess whether CAVU consecutive point network can successfully carry private overhead and management traffic on CAVU's system.

CAVU, Inc.
Application for New Experimental License
Exhibit B
Item 5A

This is an application for two-way, point to point service. Each site will transmit to, and receive from, the other site. One site will transmit in the horizontal plane, the other site will transmit in the vertical plane. Included in the application is a Page 3 for each transmit receive site (two Page 3s).
