

2020-08-19

To Whom It May Concern:

This is to certify that:

Celona Inc., deploys and/or manages radio frequency equipment.

The RF experimentation will be conducted by following a strict Test Plan and approved by Celona Inc., in a controlled environment.

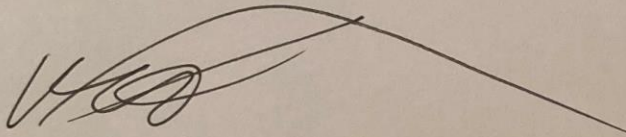

Celona Inc., will have a Project Manager and CPI in place to specifically follow the Test Plan, track results, and publish test results.

Celona Inc., has extensive RF experience and expertise deploying RF networks and has radio frequency engineers on permanent staff.

The equipment deployed will interface with the Google SAS to coordinate frequency and power level selection and will obey commands/grants from the SAS to protect incumbents or PAL holders operating in the specified geolocation.

For the above reasons, I believe Celona Inc., meets the Eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

A handwritten signature in black ink, appearing to read 'B. White', with a long, sweeping horizontal line extending to the right.

Brian White

Director, Systems Engineering, Celona Inc.
