Subject: Additional Information Request

Message:

Hello Nimesh,

The IARU stated they are opposed to the use of their spectrum by CesiumAstro. In efforts to avoid operation within their spectrum, we have modified our previous frequency request from 2441 MHz to 2455 MHz. This change has been made to the FCC 442 application, as well as to documents where noting this change is applicable. These updated documents have been uploaded as exhibits.

Best,

Austin
