FAA Coordination Status

FAA Non-Government Temporary coordination numbers are pending. Mike Bowers at FAA Central Region HQ is working the coordination requests. Original coordination requests were for two-year authorizations via Experimental Licenses. Mike has indicated the FAA requires additional time to consider long term authorizations, but will coordinate short term requests for STAs until a decision is reached. Mike is working on the coordinations for this STA application and has promised to complete ASAP. Copies of the emails requesting coordination are attached to this application.
