

Verification

I have accurately and fully completed the FCC electronic application saved in the Experimental Licensing System on 24 Oct 2007, File Number 0590-EX-PL-2007 for a Special Temporary Authorization (STA) Experimental License to authorize frequencies for testing and certifying a new antenna configuration. I understand that Cessna, through Cessna's Legal Department, will be relying on and making representations, including to Textron Inc. and the Federal Communication Commission, under penalty for making false statements, based on the thoroughness and accuracy of the information that I provide.
