

EXHIBIT A-1

Channel Master is developing an 18GHz CARS Band signal delivery system to accompany the existing 13GHz product line. Channel Master has been granted FCC equipment authorization; identifier number BUF8WS6618.

This license will permit testing of different equipment by allowing the transport of signal from Channel Master's CATV Head-End to the research and development facility.

Mr. Frank Wright of the FCC (202-653-8141), after examining our plans recommended Form 442.
