

EXHIBIT A-1

Channel Master is continuing development of an 18 G Hz CARS Band and Part 101 signal delivery system to accompany the existing 13 GHz and 18 GHz product line. Channel Master has been granted FCC equipment authorization; identifier number BUF8WS6618/

This license will permit testing and development of different equipment by allowing the transport of signal from CATV headend to the research and development facility.

Mr. Frank Wright of FCC (Voice 202.418.2411), after examining our plans recommended Form 442.
