Subject: FCC File # 0415-EX-PL-2008

Message:

Mr. Mark Arend,

Where will this wind profiler radar be used, in a parking lot, on a rooftop, in a field?

How will you ensure that RF safety is maintained during operation? For example, if the radar is positioned on a rooftop, will the radar be turned off before anyone gains access to the roof and remain turned off during their duration on the roof?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of October 10, 2008 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
