I believe one of the two 151.1375 below is a typo.

Good Afternoon, John –

The New York City Department of Information Technology and Telecommunications ("DoITT"), on behalf of the New York City area stakeholders for the multi-band radio project, request the referenced Special Temporary Authority in order to test the Thales Communications Liberty radio within the urban environment. NYC DoITT requested one (1) frequency each VTAC, UTAC and 800 MHz ITAC/ICALL from the NPSTC Channel Naming Plan, and also one (1) Channel 16 city wide pair, 484.9375/486.9375 MHz.

We have conducted a search of the FCC's Universal Licensing System for each of the frequencies requested. Our results are shown in the table below.

Frequency	Call Sign	Licensee	Output Power Watts	Bandwidth KHz
151.1375		No other licensees		
453/458.2125	KD41458	City of New York DoITT FCC License Support	2	20
	WPKY646	City of New York DoITT FCC License Support	2	20
484/486.9375	WQHX483	City of New York DoITT FCC License Support	110	11
769/799.24375		No other licensees.		
773/803.25625		No other licensees.		
866/821.0125	WPDF467	City of New York DoITT FCC License Support	70	20
866/821.5125	WPDF467	City of New York DoITT FCC License Support	70	20

We have amended our original application to delete frequencies **155.7525 MHz** and 453/458.4625 MHz to avoid interference with other existing licensees.

Please contact our office with any questions.

Regards,

Carolann Schmitt
