Message:

CNC Technologies has a contract with the Jamaican Defense Force (Contract # JDF/CNC201901). We are contracted to provide and install mission systems, including Video Microwave Downlink on eight (8) Bell 429 Helicopters. Our plan is to begin testing the helicopters and the Video Downlink on or about 4/15. These test flight will be 20-30minutes in length with 1-3 flights per day for three days. We will then perform the next rounds of testing four months from now. We agree to coordinate with the local frequency coordinator during this time.
