

Exhibit 1

There is pending at this time a modification application for Station WE2XDA under File No. 0054-EX-CM-2020. Pursuant to Commission staff direction the licensee has been continuing to work to complete FAA coordination and obtain Commission grant of the modification application before the license expiration date of June 1, 2020, and before filing of a renewal application. However, because FAA coordination remains ongoing and the modification application has not yet been granted, this renewal application had to be filed prior to the June 1 expiration date to retain operating authority. The licensee understands that the Commission waives the renewal filing timeframe specified in Section 5.59(a)(2).

The licensee requests that upon grant of renewal, the Commission include the modifications requested in File No. 0054-EX-CM-2020.
