

File No. 0996-EX-ST-2015

As addressed with staff, this submittal respectfully requests reconsideration of the 11/4/15 dismissal of the above-referenced filing, and that the application be placed on pending status. As the Commission is aware, the FAA has confirmed that is in fact continuing its review of the applicant's suggested discrete frequencies. The applicant is advised by FAA that it is working to expedite review of the discrete frequencies, and that at this time FAA is conservatively estimating completion of its coordination by COB 13 November.

Accordingly, it is respectfully requested that the application be placed back on pending status and that FAA be permitted to continue its coordination efforts. The applicant will continue to keep the Commission apprised of the status of FAA's coordination as such becomes available. Should FAA advise that additional time is necessary to complete coordination during this period, the applicant will advise the Commission of any such request.
