

August 3, 2019

To Whom it May Concern:

This is to certify that:

Comcast Cable deploys and/or manages radio frequency equipment.

The RF experimentation will be conducted by following a strict Test Plan defined and approved by Comcast Cable in a controlled environment.

Comcast Cable will have a Project Manager in place to specifically follow the Test Plan, track results, and publish test results.

Comcast Cable has extensive RF experience and expertise deploying RF networks and has a number of RF engineers on permanent staff.

For the above reasons, I believe Comcast Cable meets the Eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

Joseph Trouton
Director of Operations
Comcast Cable
