

December 3, 2020

To Whom It May Concern:

This is to certify that:

CommScope is a manufacturer of radio frequency equipment.

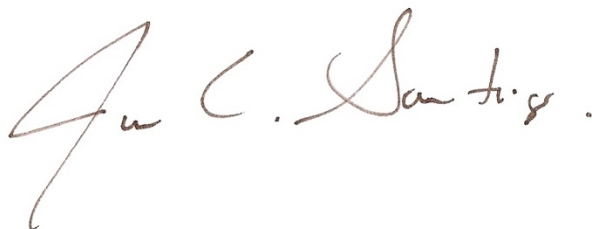

The RF experimentation will be conducted by following a strict Test Plan defined and approved by CommScope in a controlled environment.

CommScope will have a Project Manager in place to specifically follow the Test Plan, track results, and publish test results.

CommScope has extensive RF experience and expertise with over 20 years developing and commercializing dozens of RF products and has a significant number of RF engineers on permanent staff.

For the above reasons, I believe CommScope meets the Eligibility criteria for an Experimental License as set forth in the Commission Rules.

Sincerely,

A handwritten signature in dark ink, reading "Juan C. Santiago". The signature is fluid and cursive, with a large initial "J" and a distinct "C" for the middle name.
