

Attachment to File No. 0001-EX-PL-2008

Licensee was granted a similar experimental authorization under File No. 0309-EX-PL-2005, Callsign WD2XVB, which expired December 1, 2007. During the life of this license, periodic operational tests were conducted but they ceased in the fall of 2007 due to a variety of technical and operational issues. At this time, it is anticipated that a final formal application can be filed toward the latter part of 2008. In the meanwhile, however, this further experimental authorization is requested to allow final testing and operational evaluation in the subject frequencies. Thus, while we anticipate no more than a one-year requirement, the two-year authorization is nonetheless requested to assure compliance during any possible extended testing period and during the pendency of any subsequent permanent application under Part 25.
