

Reason For Request for Extension of Cornell PAN STA 2342-EX-ST-2019

We are requesting an extension because the existing STA runs only through February 1, 2021, but due to repeated slips of the Virgin Orbit Launcher 1 mission, the launch date currently is expected No Earlier Than July 15, 2021.

We request a new STA with all parameters the same except the period of the license, which we request to be July 15, 2021 through January 14, 2022. There are no other changes.

We request the STA be issued by June 15, 2021, the date when the spacecraft will be delivered to the integration facility.
