Message:

I received the following question pursuant to my request to modify my experimental lincense:

"Please explain the purpose of modifying your experimental license."

The purpose is to move the address of the license from St. Croix, USVI, to Ithaca, NY. Recent hurricanes destroyed our research site on St. Croix, and we seek to continue our project from Ithaca, near our home university. This was explained in the justification document that accompanied the application. I can retransmit that document if it would b e helpful. The coordinates of the new site are part of our application.
