

Supporting Documentation

This STA is being requested for coverage of the baseball World Series and play offs leading up to and including the World Series. This event requires more RF spectrum than is available by other means. By the nature of this sporting event, dates and locations are not known until just prior to the start of the playoffs. This uncertainty of dates and locations causes a time issue with filing for a standard STA. Because of this date and location uncertainty this filing contains all major league ball parks. Events will only take place at some of these locations. The actual locations and dates will be amended to this filing upon the release of schedules by Major League Baseball near the end of September 2014. The approximate operating start time would be 09/28/2014. It is being requested that this STA be issued with, if necessary, a contact number or e-mail address that can be used to provide the needed location and date information for coordination activities.
