

Supporting Documentation

Use of 3200 – 3600 MHz and 2200 – 2290 MHz will be for Wireless Camera coverage of the 2015 Super Bowl NFL Game. Applicant is a television microwave and communications equipment Rental Company which provides video, audio and communications for broadcast, satellite broadcast and cablecast of sporting and other events. Applicant has certain LTTS, BAS and private wireless licenses for this purpose. However, the spectrum demands at sports events, and the limited LTTS/BAS spectrum for these events makes it necessary to make coordinated, temporary use of additional channels in the vicinity of 1 to 3 GHz and TV channels . Such is necessary to have sufficient video relay from RF cameras at numerous locations at a golf course, or in arenas, as well as communications, while allowing normal ENG use of the BAS spectrum at the same time in a given venue.
