3200-3550 MHz	MO	8M00D7W	1 W (ERP)	

Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (3) CP Communications coordinate with the local Society of Broadcast Engineers frequency coordinator prior to operation in 494-500 MHz, 500-506 MHz and 578-584 MHz bands
- (4) CP Communications may not operate in the requested 1780 – 1850 MHz band due to ongoing sensitive law enforcement operations in the area.
- (5) CP Communications should be aware that the band 2200-2290 MHz is allocated for federal operations and is a highly congested band. Non-federal use is on a case-by-case basis. CP Communications should have no expectations of automatic approval in this band in future submissions.
- (6) This frequency assignment in one of the bands 1435-1525, 2310-2320 and 2345-2390 MHz was coordinated prior to authorization with the Area Frequency Coordinator (AFC), who also coordinated it, as appropriate, with Aerospace and Flight Test Radio Coordinating Council. Use of this frequency under the authority of this assignment is subject to such further coordination with the AFC, as necessary to ensure compatibility with existing uses.
