AFTRCC comments: non-interference basis to Flight Test telemetry.

This coordination does give requester exclusive use of the coordinated bands. Due to high demand for STA coordination for this event, as in previous years all requests will receive band assignments.

For Super Bowl play, the on site NFL Spectrum coordinator will assign individual assignments to those with valid AFTRCC coordinations and FCC STA's.

For pre-game events, those companies having valid AFTRCC coordinations will be requested to coordinate a spectrum usage plan among themselves.

If one cannot be negotiated among the individual companies than the AFTRCC coordinator will assign individual frequencies.

Please reply via return email as to concurrence, non-concurrence, scheduling, or additional comments.
