

Request to Expedite Application Processing

June 5, 2013

Cubic is currently working with Northrop Grumman on the development and verification of a satellite communications system for use on unmanned aircraft.

A verification test is critical to the system development and has been scheduled starting July 5, 2013. Coordination of this test is complex as satellite resources, aircraft, and tested equipment must be obtained.

This verification test is an important milestone in the development of a system for use by the US government for national security needs.

Following is information on the government program:

Contract # N00019-00-C-0277
Northrop Grumman Systems Corporation
Unmanned Systems
P.O. Box 509066
San Diego, CA 92150-9066

Program Executive Office for Strike Weapons and Unmanned Aviation
PMA-263
47123 Buse Road
Patuxent River, MD, 20670-1547

We request that our temporary license application be reviewed and granted by the FCC as soon as practical. Please contact the following person to discuss this application.
