Subject: RE: OET Modification No.: 0090-EX-ML-2004

Mr. Quianzon

We're running a little behind temporarily due to short staffing in our coordination branch. Please allow another 60-90 days.

I took a quick look at your filing. Please submit an exhibit describing the changes requested. You should justify the need and explain why this is for experimentation as opposed to a build out of systems. Also include the number of units to be tested and justification.

Subject: OET Modification No.: 0090-EX-ML-2004

Messrs. Kennedy, Serafini and Huie:

We submitted the above modification application 60 days ago for Station WC2XUV. Could you please advise us of the status of the application and if further effort is needed on our part to expedite the processing.

As always, thanks for your help.

- Raymond
