Subject: Additional Information Request

Message:

I have 2 questions:

1.)Concerning the geographic coordinates requirement. I need to travel around to different environments and terrain to run non-line-of-sight tests. For example, forests, sand dunes, water, etc. And the location may vary depending on the weather. This is why I requested a mobile license. This terrain is not all available within some small radius of a single location. Can the radius include all of Texas, for example? If not, why is mobile license an option on the form?

2.)I asked for confidentiality because I don't want the FCC posting my email and phone number everywhere for scammers, and advertisements. Will my email and phone number be publicly available, or do requests for this information from 3rd parties go through the FCC? If so, I don't need the confidentiality.

Thanks,
David
