---

Message:

Delmarva Power and Light Company (Delmarva) submits this modification to the license identified by call sign WK2XMJ to add a site at Westover, MD. Delmarva continues to conduct experimental tests to evaluate advanced communications capabilities in the 896-901/935-940 MHz band service. Delmarva is discontinuing tests at its Whaleyville site due to a variety of factors and is replacing the Whaleyville site with the new Westover location. Accordingly, Delmarva is modifying its license to reflect the change in location.
