

Justification of Confidentiality EL11528

Digital Angel requests confidentiality because the STA application is for beta testing only. Among its implications:

1. The test units are not for sale to the general public, and shall be offered to beta testing participants at no charge.
2. Design of the units may change during or as a result of the proposed testing.
3. Digital Angel Corporation shall offer no warranty of continuation of service or commercial availability either during or after conclusion of the beta testing, and make this clear at the outset to all who participate in the proposed beta testing.

Therefore, confidentiality is requested in order to eliminate any possibility of misleading the public.
