

The proposed test operation is within CDPD cellular coverage zones of the following US cities including their associated metropolitan (“metro”) areas as applicable:

- a. Austin, TX,
- b. Coral Springs, FL (if not as otherwise included in Miami metro area).
- c. Dallas, TX,
- d. Dallas, TX,
- e. Los Angeles, CA,
- f. Miami, FL,
- g. Nassau & Suffolk Counties, NY (i.e. Long Island; if not otherwise as included in New York metro area)—has DA offices.
- h. New York, NY—has DA consultant offices.
- i. Palm Beach, FL—has DA office,
- j. Philadelphia, PA,
- k. Randolph, New Jersey (if not otherwise as included in New York metro area)—has DA office.
- l. Riverside, CA (if not otherwise as included in Los Angeles metro area)—has DA office,
- m. San Francisco, CA,
- n. Minneapolis/St. Paul, MN—DA Headquarters.

This is a total of 14 city-related regions of proposed operation; and reduces to 10 regions if metro areas are fully applied. The number of test units, up to 210, is of the order of 20 per region to ensure an adequately variegated tester base within said regions.
