---

Message:

I believe AFTRCC coordination was completed on the 25th, or 26th, of June. The AFTRCC request I submitted was for the Devens site only. The frequencies requested were 2358.5 and 2388.5 MHz. The application will be modified to these frequencies at the Devens site and to exclude 2351 to 2400 MHz at the Cambridge site once I have final confirmation from AFTRCC.

Thank You ,

Vincent Attenasio
