RE: Statement of Cognizant Engineer (COGENG)

Dear Sir:

I am an employee of DRS Codem Systems, Inc. who is a U.S. Government contractor with several ongoing projects involving radio direction finding equipment development. This equipment is used to produce lines of bearing on known and unknown emitters for the purposes of signal prosecution and spectrum management.

I have a long history of working with the FCC's laboratory in gaining new equipment Type Certification on many Part 15 and Part 90 intentional radiators under H25. I also have submitted information to the NTIA under DD-1494 for several RF systems. I have held a General Class Radiotelephone License and hold an Extra Class Amateur License. My background information is a matter of record with the FCC.

Sincerely yours,
DRS Codem Systems, Inc.
