Message:

Leanne,

The frequency band 2385-2390 MHz which I thought had been re-allocated away from federal use is apparently still being used for flight test operations. This would not be a good choice as far as compatibility goes. I will withdraw this band from the application form.

I still need an area in S-Band for testing so I will try for the 2305 - 2310 MHz shared commercial band. I will enter this as a replacement band.

Mike Murphy
