

NOTIFICATION

By this Notification, DRS Training & Control Systems, LLC hereby advises the Commission that the company's operation under the WG2XQV license will now include operation with the emission designator "17M5D1D" in the "14.6-15.2 GHz" frequency range at both locations on the license. Pursuant to 47 CFR 5.77(a)-(b), the licensee understands that it may proceed at this time with operation of the facilities utilizing the new emission designator because the following items are true:

- The operating frequency will not deviate more than the allowed tolerance;
- The emissions will not occur outside the currently authorized bands; and
- The ERP complies with the license and the regulations governing the same

Although the licensee is proceeding with operation using this new emission designator, pursuant to Section 5.77(b) the licensee will in the near future be filing an application to permanently modify the license to reflect such usage.
