

DEPARTMENT OF THE NAVY
NAVY AND MARINE CORPS SPECTRUM CENTER
6916 COOPER AVENUE
FORT GEORGE G. MEADE, MD 20755-7901

Mr. Greenwalt,

February 8, 2013

The Department of the Navy requests HQ FCC to modify (STA 573-EX-PL-2012) Special Condition (5) which currently states: "The applicant and DOD user be advised that use of the band 7900-8400 MHz in United States for this type of system is restricted and will need Senior DOD officials approval. For more information the DOD users can call Mr. Moorefield 301-225-3728", to the correct DOD Navy Representative.

The corrected verbiage for Special Condition (5) needs to read as follows: "The applicant and DOD user be advised that use of the band 7900-8400 MHz in United States for this type of system is restricted and will need Senior DOD officials approval. For more information the DOD users can call Mr. Tom Kidd 703-695-1978."

The Department of the Navy appreciates any and all assistance provided in correcting this issue in a timely matter. Please advise immediately if there is anything you require from Navy.

Thank You,

Mr. Ken Stowe
Frequency Assignment Subcommittee Rep
