Mr. Jose Trevino,

DRS Surveillance Support Systems, Inc. a DOD Electronic Manufacturing, Integration and Test Facility located at 6200 118th Avenue North, Largo Florida is currently under contract with the US Army to integrate and test a border security system. The system consists of nine towers each with a Radar system and other various communication radios (as listed in the FCC application). The systems will be deployed on existing towers in the country of Jordan with the end user being the Jordanian Armed Forces.

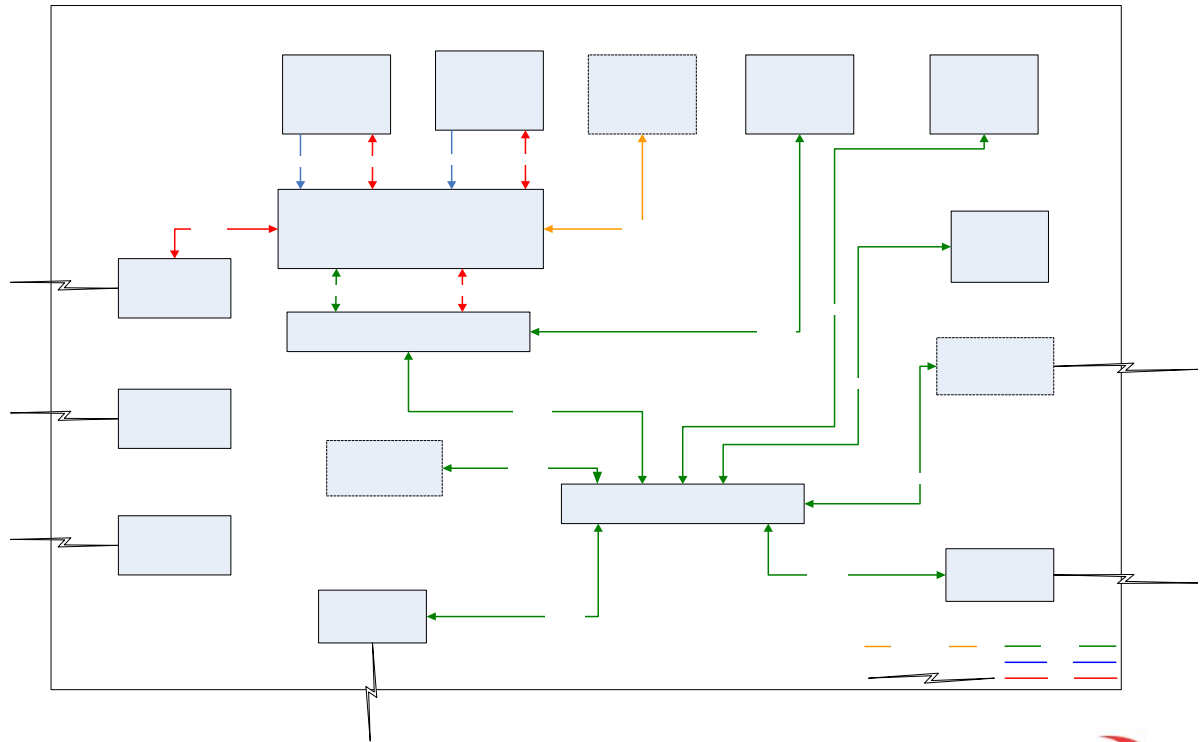

See figure 1 for a layout of the testing site. (DRS Largo, FL)

See figure 2 for a block diagram of one of the nine systems to be tested.

Test Range Overview.
