Mr. Jose Trevino,

DRS Surveillance Support Systems, Inc. a DOD Electronic Manufacturing, Integration and Test Facility located at 6200 118th Avenue North, Largo Florida is currently under contract with the US Army to integrate and test a border security system. The system consists of nine mobile towers each with a Radar system and other various communication radios (as listed in the FCC application). We will be testing that the radio's can send & receive voice & data. After testing, the systems will be delivered to the country of Jordan with the end user being the Jordanian Armed Forces.

See figure 1 for a layout of the testing site. (DRS Largo, FL)

See figure 2 for a block diagram of one of the nine systems to be tested.

Test Range Overview.
