

Exhibit 1

In an effort to reduce administrative burden on the Commission while still addressing current operational requirements, this application is submitted to reduce the number of locations authorized under the WJ2XQV license by deleting 8 existing locations, and to increase the radius of two existing locations, as follows:

- Delete the following locations:
 - Existing Locations #3 and #4 – Harvest, AL (Ground & Airborne)
 - Existing Locations #5 and #6 – Hurtsboro, AL (Ground & Airborne)
 - Existing Locations #9 and #12 – Taft, TN (Ground & Airborne)
 - Existing Locations #15 and #16 – Redstone Arsenal, AL (Ground & Airborne)
- Expand radius of Existing Locations #1 and #2 to 35 km in order to accommodate current operational requirements. This radius will now encompass the deleted Locations 3, 4, 9, 12, 15 and 16. Although Locations 5 and 6 (Hurtsboro, AL) fall outside this expanded radius, these locations are no longer required for the experiment.
