**Subject:** Amended EchoStar Broadband Experimental License Application

Behnam,

Attached is a PDF of the amended EchoStar Broadband experimental license application (0270-EX-PL-2006) and the amended attachments for this application. This application now only requests authority to operate in the 2500-2655 MHz band and no longer requests authority for experimental operations in the 3400-3600 MHz band. Please let us know if you have any questions on the amended application.
