

June 10, 2019

To whom it may concern:

Edge Networks LLC deploys and/or manages radio frequency equipment.

The RF experimentation will be conducted in accordance to a strict test plan defined and approved by Edge Networks in a controlled environment.

Edge Networks will assign a project manager to specifically follow the test plan, track results, and publish results. The company has extensive RF experience and expertise deploying RF networks and has RF engineers on permanent staff.

For the above reasons, I believe Edge Networks meets the eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

A handwritten signature in black ink, appearing to read "Ray Lam", written over a horizontal line.

Raymond Lam
