

Exhibit 2

Similar License

A similar license for the same purpose and end user was granted to Andrew Scicomm inc. in Garland Texas on July 18, 1996 under the call sign WA2XBK and again to Condor Systems, Electronic Systems Division in Simi Valley, California on August 21, 2002, under the call sign WC2XQT.

The original contract was to the Egyptian Armament Authority, Kobry EL Kobba, Cairo, Egypt: contact number: Cairo/F/ER/ANDREW *SCI*/99/2(98-47/1)

We would like to be granted a license to use the same set of frequencies as were granted in the previous licenses. The purpose of our license request is essentially the same as the previous two licenses grants. EDO Communication and Countermeasures Systems is the same company as Condor but has recently moved it's facilities to the address listed in the new FRN and license application. This license is necessary to test and calibrate the same system (now called the CS-3000) as was referred to in the previous two licenses as the SCR-2900.
